FEATURES

Everything You Need to Sell Online

Enterprise comes packed with production-ready features for your e-commerce business.

Product Management

Full CRUD for products, categories (3-level), brands, attributes with values, colors, and product variants with SKU combinations.

Cart & Checkout

Guest and user cart, address management, shipping cost calculation, coupon application, and multi-payment checkout flow.

Order Management

Order listing, status tracking, payment updates, delivery assignment, bulk operations, and PDF invoice download.

Flash Deals & Coupons

Roles & Permissions

Granular RBAC with Admin, Staff, and Customer roles featuring fine-grained permission controls across the platform.

Analytics & Reports

Stock reports, sales reports, wish reports, user search analytics, wallet transaction history, and commission tracking dashboards.

Marketing & Comms

Newsletter management, bulk email campaigns, SMS via Twilio/Nexmo/SSL, Firebase push notifications, and Google reCAPTCHA.

CMS & SEO

Blog management, custom pages (About, Terms, Privacy), banners, dynamic sitemap.xml, robots.txt, and per-page OG meta tags.

Wishlist & Reviews

Public and private wishlists, product reviews and ratings with admin moderation for quality control.

System Administration

General settings, SMTP config, currency/language management, file manager (Aiz Uploader), cache management, and database backup.

User Management

Email/password auth, social login (Google, Facebook), email verification, password reset, profile management, and address book.

TECHNOLOGY STACK

Modern Stack, Battle-Tested

Built with Laravel + React + TypeScript — combining enterprise reliability with modern frontend performance.

Backend

Laravel 8

PHP 7.4+ / 8.0

MySQL

Laravel Sanctum

Laravel Socialite

Eloquent ORM

Redis (Predis)

GuzzleHTTP

Intervention Image

Laravel Excel

Dompdf / PDF

Simple QR Code

AWS S3 (Flysystem)

Spatie Db Dumper

Laravel CORS

JWT (Icobucci + firebase)

Frontend

React 18

TypeScript 5.9

Vite 7

TailwindCSS 4

ShadcnUI / Radix UI

Framer Motion

React Router v7

Redux Toolkit

TanStack React Query v5

Axios

Lucide Icons

Swiper

React Helmet Async

React Hot Toast

SMS & Communication

Twilio

Nexmo (Vonage)

SSL Wireless SMS

BulkSMSBD

MIM Bangladesh

Mailgun

AWS SES

Firebase Push

DevOps & Infrastructure

GitHub Actions (CI/CD)

Apache (.htaccess)

cPanel

Composer + NPM

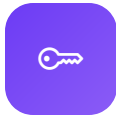

Laravel Mix + Vite

SECURITY

Enterprise-Grade Security Posture

Defense-in-depth approach protecting your platform across every layer — from network to application.

Authentication & Authorization

Multi-guard authentication (web + Sanctum API tokens), role-based middleware (IsAdmin, IsUser), email verification, password reset with throttling, social login OAuth 2.0.

Sanctum

RBAC

OAuth 2.0

Email Verify

Throttle

CSRF & XSS Protection

Laravel VerifyCsrfToken on all web routes, Blade auto-escaping (`{{ }}`), React's built-in XSS prevention, custom `htmlToPlainText` sanitizer, JSON-only API responses.

CSRF Tokens

Auto-Escaping

Sanitization

SQL Injection Prevention

All queries go through Eloquent ORM with parameterized

HTTPS & Secure Comms

HttpsProtocol middleware redirects HTTP to HTTPS (`FORCE_HTTPS=On`), Apache rewrite rules enforce SSL, production debug disabled (`APP_DEBUG=false`), sensitive env vars blacklisted from output.

HTTPS Enforce

Debug Blacklist

.htaccess

Session & Cookie Security

HttpOnly cookies, separate admin/frontend session cookies preventing session conflict, 24-hour session lifetime, configurable domain and path.

HttpOnly

Session Isolation

Secure Cookies

CORS & API Security

Input Validation & Uploads

Laravel Request validation (`validate()` + Form Requests), file type restrictions in Aiz Uploader, safe image manipulation via Intervention Image.

[Validation](#)[File Restrict](#)[Safe Images](#)

Encryption & Secrets

bcrypt password hashing (Laravel default), AES-256-CBC APP_KEY encryption, data encryption for sensitive lookups, all credentials stored in `.env` (excluded from version control).
